

## Mosenergo and Landis+Gyr implement Russia's first smart metering solution

Zug, Switzerland, October X, 2009 - Mosenergo, one of Russia's largest energy generation companies, and Landis+Gyr, the global leader in next generation energy management, have implemented Russia's first Advanced Metering Management (AMM) solution. The goal of the solution is to improve the company's business processes and increase its energy efficiency.

"The implementation of the AMM solution is a key step to help us detect where and how much energy is flowing, automate our business processes to work on the wholesale market and simplify our customers' energy calculations," said a Mosenergo representative.

The AMM solution provided by Landis+Gyr includes system software, metering and communication devices, and AMM deployment support. The solution includes best in class grid meters for precise measurement as well as Landis+Gyr's Gridstream Converge for data processing. The goal is to automate measurement processes, validate and substitute data, and calculate the company's energy balance.

"Mosenergo is a true leader in energy efficiency in Russia and we are honored to help them build up the country's smart metering infrastructure. By improving data management, the company can enhance energy efficiency and customer relations," said Andreas Brun, Senior Vice President, Landis+Gyr.

Mosenergo is a distributed power generation company which has 19 substations situated in Moscow and the Moscow region and generates more than 60 billion kWh per year.

### About Landis+Gyr

*Landis+Gyr is the leading provider of integrated energy management solutions tailored to energy company needs. With a global presence and a reputation for quality and innovation, Landis+Gyr is unique in its ability to deliver true end-to-end advanced metering solutions. Today, the Company offers the broadest portfolio of products and services in the electricity metering industry, and is paving the way for the next generation of smart grid. With annualized sales of more than US\$1.25 billion, Landis+Gyr operates in 30 countries across five continents, and employs over 5,000 people with the sole mission of helping the world manage energy better.*

### About Mosenergo

Mosenergo is currently the largest generating company operating on fossil fuel. The power plants of Mosenergo have installed electricity capacity of 10,600 MW and thermal capacity of 39,000 MW. Mosenergo is the largest thermal generation company in the world. Currently Mosenergo is involved in major construction and design projects for generating capacities in the Russian power industry.
